Education

National Institute of Technology, Rourkela

Bachelor of Technology in Industrial Design

Sep 2023 – Present

Rourkela, Odisha

Guru Nanak Public School, Sambalpur

CBSE, Science (PCM)

May 2023

Sambalpur, Odisha

Work Experience

Auric AI Labs

Apr 2026 – Jul 2026

SDE Intern

Remote

- Collaborated with 10+ domain analysts to automate a secure, high-volume data pipeline, eliminating manual handoffs and streamlining ordering, storage, and QC enforcement.
- Partnered with data teams to engineer a centralized spatial database, enabling 12 concurrent analysts to securely edit and render geospatial data in real time.

N6T Technologies

Jun 2025 – Aug 2025

Full Stack Intern

Rourkela, Odisha

- Engineered an EHR integration for Sysmex analyzers, partnering with clinical staff to eliminate **95%** of transcription errors and reduce processing time by **40%**.
- Communicated deployment requirements to hospital IT, delivering client-side troubleshooting to maintain **99.5% system uptime** and ensure compliance with healthcare standards.

Projects

Oxide

Jun 2026

Rust, Axum, Nix, Pingora, Docker, Tokio, PostgreSQL

GitHub

- Shipped a self-hosted Rust deployment platform across a 9-module workspace, reducing container sizes by **89%** vs Docker baselines via Nix reproducible builds.
- Hosted **6+ applications** concurrently on a single VM using **Pingora** for programmatic reverse proxying and Docker/Bollard for isolated runtimes.

SahayAI

Mar 2026

Python, FastAPI, Next.js, Qdrant, Gemini LLM, Docker, Google Cloud Run

GitHub

- Built a RAG pipeline for legal QA, processing 500-page PDFs with OCR and Qdrant hybrid retrieval to achieve **92% answer accuracy**.
- Achieved **sub-2-second query latency**; deployed to Google Cloud Run via GitHub Actions to serve **10+ concurrent users** with strict data isolation.

Polynotes

Feb 2026

Rust, Tauri 2.0, whisper.cpp, SolidJs, Tokio, WASM, WebRTC-VAD

GitHub

- Integrated whisper.cpp via native FFI into a Rust/Tauri application, delivering a **10.8MB binary** with 2-4 second offline transcription latency.
- Implemented **WebRTC VAD gating** to filter silence before inference, eliminating hallucinations and supporting **multilingual code-switching** across **6+ Indian languages**.

Achievements/Certifications

Patent Application — Indian Patent Office

Aug 2026

Co-inventor on "Embedded Deep Learning-Based System for Automated Analysis of Microscopic Blood Cell Images" (App. No. 202631050265 A), published 07/08/2026 by NIT Rourkela; enables on-device Acute Lymphoblastic Leukemia (ALL) screening without external computing infrastructure.

Baker Hughes Virtual Hackathon 2025

Oct 2025

Achieved Finalist status (Top 7) in the Baker Hughes Hackathon 2025 by engineering 'Smart Sentry,' a multi-phase anomaly detector that improved fault identification accuracy by 86 percent across 3 distinct turbofan operational states.

Certificate

Technical Skills

- Languages:** Rust, Python, C++, TypeScript, Bash
- Operating Systems:** Linux (Ubuntu)
- Developer Tools:** Git, Docker, Kubernetes, Nix, Google Cloud Platform (GCP), GitHub Actions, VS Code, Google Colab, Postman, IntelliJ IDEA
- Technologies/Frameworks:** React.js, Next.js, FastAPI, Django, Tauri, SolidJS, PostgreSQL, MySQL, Qdrant, WebAssembly (WASM), Axum, Tokio, WebRTC

Extracurricular Activities

WarpLLM

Aug 2026 – Present

Open Source Contributor

Remote

- Active contributor** to warpplm, an open-source **LLM gateway**, with **merged pull requests** spanning provider integrations, testing, and contributor tooling.
